## Projects

**Graduation Project: Designing an Innovative and Sustainable Research Center for Saudi Arabia Railways**  
The project aims to design an innovative and sustainable research center for Saudi Arabia Railways (SAR), aligning with Vision 2030's goals of economic diversification and scientific advancement. The facility will feature advanced labs, ergonomic offices, and educational spaces, promoting collaboration and innovation in the railway sector. Sustainability is prioritized through renewable energy, water conservation, eco-friendly materials, and LEED-targeted design. Its modular structure ensures flexibility, efficiency, and occupant well-being while addressing challenges like extreme weather and air pollution.
